Code: 156470-39

The lighting of passage areas and workstations (public buildings, offices, hotels and restaurants) is very important. Well-lit public and residential areas contribute to providing a sense of security and wellbeing. The robust and high-quality Health recessed spotlights by Disano are the best solution, as they can be easily inserted into any setting while guaranteeing maximum efficiency and long service life.

In addition to the excellent quality of the LED light, featuring an extraordinary colour rendering index, Health spotlights are also certified as being 'low flicker', indicating a stable light output producing minimum flicker levels.

The recessed version can be equipped with light management and control technology, such as presence sensors and remote-control systems to increase efficiency and life span, avoiding waste and unnecessary switching.
