GENERAL INFORMATION

LED urban lighting sums up the values we expect from technology: light that enhance night-time environments, consumes less and adds aesthetic quality to daytime scenarios. New shapes for new lighting technologies. The dimensions of the LEDs allow the fixture to display an elegant design, while the circular shape provides optimal light distribution, and the cooling fins ensure proper heat dissipation. The innovative design is capable of bringing a new visual comfort to any context. With DISCO, LED sources generate a new concept of urban lighting, which makes the process of innovation evident. DISCO adds visibility and prestige to any lighting project. DISCO is a lighting fixture specifically designed to make the most of the advantages of LEDs in urban lighting, such as energy savings and new light quality. The all-new aesthetics of these lamp posts provide street furniture with a new appearance in tune with the desire to renew the urban landscape. The requirements of uniform light distribution and heat dissipation are also met in the best possible way.
