With the latest generation of LED floodlights, it is possible to explore new outdoor lighting possibilities. The fixtures' compact dimensions make them minimally intrusive while the high efficiency and great colour rendering of the LED sources allow designers to create outdoor lighting projects with a surprising aesthetic impact, enhancing the architecture with scenic effects, and effectively illuminating large areas, such as gardens and terraces terraces

Among Disano's new proposals, CROMO LED represents an ideal solution to effectively replace the old 600 and 1000W discharge lamps. It is an environmentally friendly product that reduces energy consumption and improves light quality

reduces energy consumption and improves light quality. CROMO LED comes in a wide range of models, with different wattages, symmetric and asymmetric optics, and different beam angles. Noteworthy is the excellent lumen/Watt ratio, which results in excellent light efficiency.

The quality of CROMO LED is also seen in the accuracy of the design and construction details. It is a fixture with a slim shape for reduced wind exposure, a fundamental requirement in outdoor lighting systems. Moreover, the fixture is made of aluminium and equipped with lenses that ensure the best performance from the latest generation of LED sources.

performance from the latest generation of LED sources. All this results in bright, high-efficiency lighting to meet any outdoor lighting needs.
