Within the range of floodlights, an excellent technological result has been achieved with the new Mini Rodio from the Rodio series. The small dimensions of this luminaire allow it to be inserted into any architecture or setting, for an aesthetic and high-tech lighting project. It is available in many versions with symmetric or asymmetric lenses, and also in a version with COB LEDs.

The excellent performance of this floodlight in terms of energy savings and luminous efficiency is accompanied by a long lifespan of 50/80,000 hours; furthermore, the use of materials with IP66 protection makes the Mini Rodio perfectly suitable for outdoor installations.

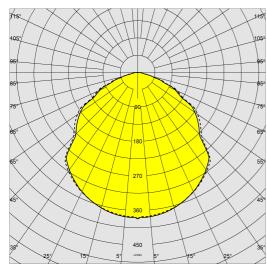

These spotlights are characterised by better light quality and a long lifespan, both guaranteed by the best possible materials and the most advanced LED sources.
