Portofino: pleasant easthetics with maximum functionality

Portonino: pleasant eastnetics with maximum functionality A touch of prestige for any residential setting, with the most energy-efficient lighting technologies. Portofino is a bollard for driveways, parks and pedestrian walkways. Produced in different wall-mounted versions, heights (150, 300 and 600 mm) and diameters, it also features a version with a flat diffuser and 3 versions with a domed diffuser, this bollard is the right solution for any lighting project. for any lighting project.

The latest generation of high-efficiency LED sources, with a colour temperature of 4000K and a high colour rendering index, ensure a long lifespan.

Portofino also stands out for the high quality materials, with a die-cast aluminum body and column with cooling fins, IP65 protection rating, and a shatterproof and self-extinguishing polycarbonate diffuser. It comes with a connector for connection to the power line and the base plate for wall installation.

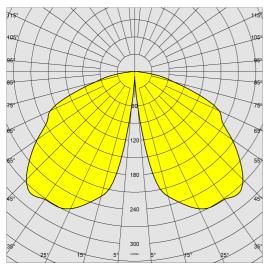

Please contact the Consulting and Design Centre for any technical information. The reported luminous flux is the flux emitted by the light source with a tolerance of ± 10% compared to the indicated value. The total wattage absorbed by the system will not exceed 10% of the reported value. Technical lighting data may be subject to changes and improvements due to the fast evolution of the technology.
